COAST-TO-COAST CONSOLIDATION

**GUARDIAN UNIFIES IT ASSETS
ACROSS A NATIONAL MERGER.**

When two major US corporations came together, the challenge was clear: unify complex IT assets across multiple states—quickly, securely, and in full compliance.

 **THE CHALLENGE**
A PROJECT AT RISK

A national merger created a critical need to consolidate IT assets across ~100 locations in the United States. The project involved decommissioning redundant systems, ensuring data destruction compliance, and managing complex cross-state logistics.

The scale, timeline, and security requirements put the project at risk of delays, cost overruns, and operational disruption.

 The project was at risk of failure.
